

Furniture for people

Elegant. Reliable. Intelligent.

Asisto

Special **drawer cabinets**

Something for everyone:
Asisto drawer cabinets are available in three heights, three widths and two depths.

Order no. 146225-411

Order no. 146223-412

Order no. 146224-622

Top-notch design is crucial - but it isn't the be all and end all. Virtues such as speed, accuracy, flexibility, load-bearing capacity and resilience are needed in the tough day-to-day office environment. And Asisto drawer cabinets from C+P have been produced with these qualities in mind.

Solid, adaptable and attractive.

Want to find what you are looking for quickly? Do you need variable interior fittings? Is convenient operation important to you? And do you need your fittings to retain this convenience for years to come – even with heavy workloads?

Then Asisto drawer cabinets are the right choice for you and there is no need for you to make any compromises because these resilient organisational wizards are the next generation in the slimline, highly elegant line of the full Asisto series. Skilful use is made of a fascinating material: steel.

435 mm deep drawer for filing cabinets:
With covered slide and closed drawer pan.

600 mm deep drawer for filing cabinets:
With optional HD (heavy duty) slide and sturdy hanging frame.

435 mm cabinet depth:

The 435 mm deep cabinets have a decor cover plate and decor fronts, both made from DCPB (directly coated particle board) as standard (steel fronts for no additional charge).

600 mm cabinet depth:

All cabinets with a 600 mm depth are supplied with a steel cover plate and steel fronts as standard (DCPB fronts for no additional charge).

One system – two variants:

All 435 mm deep cabinets can be combined with cabinets of the same depth from the full Asisto range (e.g. cabinets with double doors or sliding doors). They are fitted with decor cover plates and fronts to match. The 600 mm deep cabinets are mostly used alone or in combination with one another and are made from 100% steel.

Three-row version:

The three-row version is available for DIN A4 suspension files (with 3 or 4 drawers) in a depth of 435 mm.

Order no. 146041-313

Data carriers or cards:
Asisto drawer cabinets have the right solutions: whether you are storing CDs and DVDs or are still using the popular choice of index cards and records.

For DIN A4 suspension files:
In two-row version with 3 drawers.
Order no. 146243-312

For A6 landscape index cards:
In four-row version with 8 drawers.
Order no. 146223-824

Central lock, pull-out lock and cover plates:

All Asisto drawer cabinets have a central lock with 2 keys. A pull-out lock prevents several drawers from being opened at the same time. The cover plates are 7 mm thick (steel) or 19 mm thick (DCPB).

In the health service, drawer and filing cabinets have their work cut out for them – more so than in any other sector. A wide range of filing systems determine what furniture has to be able to do in this line of work.

A real-life solution to a real-life problem.

A high number of visitors and permanent time constraints mean that the right documents have to be on hand immediately. The furniture used is also an advert for any modern surgery. It should appear attractive and inviting to the visitor. Just like the Asisto drawer cabinets from C+P.

For DIN A4 suspension files:

In three-row version with 4 drawers.

Order no. 146021-413

For hospital patient records:

In two-row version, e.g. for the 222 x 160 mm format (W x H).

Simply the best furniture.

The difference is in the detail! A truly reliable cabinet system offers far more than just well organized storage space: it makes your life and work easier.

Cover plates and panels

Brilliantly stackable:
Thanks to the steel carcass, the top cabinets and shelves have an extremely robust and at the same time very narrow base. The advantage is that the delicate edge look is preserved even when top cabinets are used.

Steel cover plate / panels:
One of the characteristics of the Asisto cabinet system is its slimline, delicate 7 mm edge – also present with the steel cover plate (standard with 600 mm cabinet depth).

Decor cover plate / steel panels:
As an option you can select a cover plate (and panels) in the 19 mm DCPB* version. They can also be retrofitted.

Decor cover plate / panels:
This version is standard with a 435 mm cabinet depth (cover plate and panels also available here in steel).

Cabinet handle and soft stop

Elegant handle elements:
The standard Asisto handles are matt nickel-plated and are a consistent continuation of the design line.

Soft stop:
All cabinets can also be ordered with a soft stop function which shuts the self-stop system with even more restraint.

Central lock and level adjustment

Central lock with exchangeable cylinder:
Compatible with many other C+P pieces of furniture. Also ideal for the retrofitted organisation of locked groups.

Convenient level adjustment:
The Asisto level adjustment can be accessed from the interior. Guide holes make the adjusting screw easy to reach.

* DCPB = Directly coated particle board

Classic square profile base:

The base provides a wealth of benefits – be it for simple room cleaning, unhindered air outlet from ground-level vents or transport by forklift when filled.

Storage in filing cabinets

435 mm deep drawer for filing cabinets:
With covered slide and closed drawer pan.

600 mm deep drawer for filing cabinets:
With optional HD (heavy duty) slide and sturdy hanging frame.

Storage with index cards

435 mm deep drawer for index cards:
With covered slide, closed drawer pan and index card fittings.

600 mm deep drawer for index cards:
With optional HD (heavy duty) slide and index card fittings.

Practical interior fittings

Interior fittings for CDs:
Capacity per drawer (800 mm wide, 600 mm deep cabinet):
max. 120 CDs on edge (see photo)

Interior fittings for DVDs:
Capacity per drawer (800 mm wide, 600 mm deep cabinet):
max. 48 DVDs lying crosswise (see photo)

Storage for microfilm roll boxes:
Capacity per drawer (800 mm wide, 600 mm deep cabinet):
approx. 108 boxes (16 mm roll film)
approx. 60 boxes (35 mm roll film)

Modular organisational system:
With 48 mm high insert boxes in practical complete sets.

Special accessories

Special interior fittings:
e.g. for beverages (0.33 or 0.5 l glass and PET bottles)

Load-bearing capacity & guarantee

Asisto drawer cabinets offer you outstanding load-bearing capacity and service life:

Cabinet depth	Version with counterweight	With wall mounting	Slide guarantee
435 mm	up to 50 kg	up to 50 kg	5 years
600 mm	up to 50 kg	up to 60 kg	5 years
600 mm with HD runners	up to 50 kg	up to 100 kg	15 years

(load-bearing capacity per drawer)

It's your choice.

You can find the complete Asisto furniture range in the Asisto product series brochure

An ingenious combination.

You can choose from many attractive colour coatings at C+P as a standard feature. We can also always satisfy all your own particular colour requirements. You can find the entire C+P colour and decor selection and additional information on the topic of colour design in the latest catalogue. Have fun choosing!

Carcass colours:

Apart from the classic carcass colours of light grey, white aluminium and black grey, many other options are also available for Asisto.

Decors:

Fashionable decors are available for cover plates and drawer panels.

Door/feature colours:

Vivid, attractive shades are suitable particularly as front or feature colours.

Real-wood veneers:

The right choice for representative areas. Many contemporary veneers are available.

Incidentally:

C+P is a true specialist in tasteful and efficient furniture made of steel!
Over several decades, we have developed a mastery of this field that is
virtually unsurpassed. So it is hardly surprising that our customers have
made C+P the market leader in several product segments.
